Brynn Willmann (9) of the Fort Recovery High School volleyball team lets out a scream while her teammates rush to celebrate after blocking an attack by Arcanum during the OHSAA Division VI Regional 24 semifinal hosted by Northmont on Wednesday. Willmann led the Tribe with 13 kills and five blocks as it clinched its third regional final berth with a 25-20. 21-25, 25-21, 26-24 victory over the top-seeded Trojans. For the full story, see page 7.

nsurance contribution increased

By BAILEY CLINE The Commercial Review

Jay County will contribute more toward employees' health insurance plans in 2026.

Jay County Commissioners agreed during a special session Wednesday to contribute additional dollars toward employees' Health Savings Accounts and pay for employees premiums in November and December next year. They also approved the county's insurance plan for 2026.

Plans are to pay an additional \$25 per quarter toward Health Savings Accounts for individual plans and \$50 per quarter toward Health Savings Accounts for plans with spouses or dependents.

The county's premium through Physicians Health Plan for 2026 increased by 5%, about \$77,000. Next year's annual contribution for the county — that includes

County will give more toward employee accounts, premiums

portions allocated for Health Savings Accounts, Health Reimbursement Arrangements and other fees — came in at just under \$1.7 million.

County auditor Emily Franks pointed out that the county has an \$80,000 credit with next year's plan, which offsets the increase. It also received an \$80,000 credit last year.

Using that extra money, she suggested putting more funds toward employees' Health Savings Accounts next year, reducing premiums or doing both options.

She pointed to \$100 and \$200 increases in Health Reimbursement Arrangements next year. To cover that increase, she continued, the county could pay an estimated \$22,700 toward Health Savings Accounts. (Those figures are based on the number of employees on the plan currently.)

Commissioners president Chad Aker noted there are currently 100 employees with Health Savings Accounts and 20 employees without them. He spoke in favor of the decision. Commissioner Doug Horn noted the

employees without Health Savings Accounts wouldn't see a benefit from an increased contribu-

If the county were to reduce employees' premiums by about 5%, Franks explained, that would cost about \$6,000. She suggested offering the increased contributions to Health Savings Accounts and slightly reducing premiums.

Commissioner Duane Monroe pointed to conversations he's had with county employees and other individuals. If the county doesn't receive an \$80,000 credit for 2027. he added, it may not be able to continue offering a 5% decrease in premiums.

'Then, all of a sudden, it's going to from nothing to a whole bunch if it's not there, and honestly, I feel like if your insurance (doesn't) go up, in my opinion, (it) is a win," he said.

Upp set to leave role as recorder

Resignation is effective for Dec. 31; caucus set for Nov. 20

By BAILEY CLINE

he Commercial Review Jay County Recorder

Melanie Upp is resigning. Upp recently alerted officials to her plans to leave office, with her last day set for Dec. 31. Her term isn't set to expire until the end of 2026.

She cited ongoing health issues as her reason for resigning from the role. She talked positively about working with the public over the last three years, saying she's enjoyed it immensely.

"I appreciate the support of all the voters, and I just thank them for helping me to be able to enjoy my job," she said.

She also spoke highly of her first deputy Angie Byrum and part-time clerk Laura Ferguson, saying she's been blessed to have them.

Jay County Republican Party Chair Jenae Blasdel emailed notice of a caucus to fill the vacancy Tuesday morning. Plans are to host a Republican caucus at 6 p.m. Thursday, Nov. 20, at John Jay Center for Learning to elect a new recorder.

recommended Upp Republicans elect Byrum to fill the role, saying she knows every step of the job. She and Byrum have worked together at Jay County Courthouse since

Upp took office. "She's more than qualified to do it," said Upp. "When we came in here, we had an agreement that I would know everything she did, and she would know everything I did so we could work well together. And that's what we've done."

Upp's term has been highlighted by a partnership with Doxpop for its Property Alert service, which began in early 2024.

Rehab expands

Hospital's activity room provides additional opportunity to prepare patients to return home

By RAY COONEY The Commercial Review

Patients are anxious to get home after a major medical event.

The transition, though, is not always easy to make. IU Health Jay has added

a feature in hopes of making the process a bit smoother. The hospital held a rib-

bon-cutting ceremony for its new Rehab-to-Home Activity Room. There was also an open

house for its new wound healing center last week. 'We're really excited to have this opportunity to have an activity of daily liv-

ing space for our rehab to

home, swing bed program,"

said Christina Schemenaur, chief operating officer of IU Health Jay. "It is an opportunity for our patients to get outside of the four walls of their room, have a more community, multidisciplinary feel to help with their healing. We can simulate how to make sure they're independent and confident in the way they can bathe, cook, dress, just take care of themselves at home, either independently or with family.

The activity room is equipped to allow patients to practice everyday tasks, in order to ensure that they are ready to leave the hospital and return home.

Located on the second floor of the hospital, it features a washer, dryer, range, microwave and refrigerator. There are also two shower set-ups, one with a standard bathtub and the other without. A bed and chair simulate a bedroom environment.

Another piece of equipment allows patients to gauge whether they are able to effectively get into and out of a car.

"Our goal is to be able to return patients to their homes where they're safe and for them to be able to continue to heal," said physical therapist Brian

Rehab

Continued from page 1 So we can simulate if they need to be able to be in their

So if they had a recent stroke and they've lost use of their arm or their leg or have balance issues, we can try to be able to simulate for us to be able to work with some of that activity."

Before the Rehab-to-Home Activity Room was added this summer, the hospital staff was limited to what was available to them in the patient rooms.

It is also used as a place for patients to get out of their typical hospital rooms. They can go there to spend time with family and play games — Yahtzee and Julie Teeter said — in a space that feels more homey and less clinical.

"It's brighter in here," said Schemenaur. "You feel like you're more in a home environment than a medical environment."

"And you're not stuck in that room staring at the four walls." added Ison, noting that the average hospital stay is 10 to 14 days.

The wound clinic is a returning service to the hospital after the previous iteration closed in 2020 because of a change with the doctor who was providing those services.

Partly cloudy skies are expected

Wednesday

may hit 36.

Farkle have been popular, nurse ly Medicine expressed an interest in wound care, which has allowed the hospital to offer the clinic again. It is currently open on Tuesdays and Thursdays inside Family First Healthcare in the hospital, with Whetzel as the provider and medical direc-

"We continued to have a need for wound care in our community," said Schemenaur. "There's a backlog of wound care opportunities in Muncie and in the other clinics it is extremely busy. And so the backlog was causing problems for our community and our patients."

She said the clinic predomi-

patients who get ulcers and can have a difficult time healing. Patients can also include those who are post-surgical or have poor circulation.

The hospital's therapy department is also now able to provide care for lymphedema — swelling caused by an abnormal accumulation of lymph — which is a common side effect of some cancer treatments. Assistance with bandages, exercises and massage can help with the swelling.

Schemenaur added that IU Health Jay is working with IU Health Ball and hopes to be able to provide perfusion testing medical imaging that measures Dr. Jerry Whetzel of Jay Faminantly works with diabetic blood flow — in Portland as well.

Couple's anniversary plans now include in-laws

DEAR ABBY: My husband and I discussed our 25th anniversary and mentioned Hawaii as a possibility. He reached out to his brother and sister-in-law for suggestions, since they have visited Hawaii twice and we never have.

My husband mentioned to my sister-in-law (without consulting me) that maybe the four of us should travel together to Hawaii. Now my in-laws want to travel with us! My husband is enthusiastic because it will lower the cost. I am very hurt that I wasn't even consulted. I didn't know until I overheard them talking about splitting costs on the Hawaii trip.

Abby, I was not planning a 25th anniversary as a foursome. My husband is calling me a "sourpuss" for not jumping on board with the plan. In my mind, it's supposed to be an anniversary, not a couples retreat. Am I wrong? CROWDED IN THE SOUTH

Dear Abby

DEAR CROWDED: You are not in the wrong. That your husband and in-laws would alter the plans for your 25th anniversary without consulting you is disrespectful. You should have been consulted. That he has now resorted to name-calling because you are upset is out of line.

If you feel you won't be happy celebrating this milestone with them, tell your sister-in-law this was sprung on you with no preparation, which you feel was wrong, and you are not happy about it. Then decide which YOU would prefer — to travel to

Hawaii as a group anyway or — there could be any number for to just stay home.

DEAR ABBY: My father is an antiques collector. He spends every weekend at estate auctions and much of the rest of his time buying for shops. He is experienced and prides himself in knowing the value of things.

For my birthday, Dad gave me an old copy of a favorite book. He said it was a first edition and worth a lot despite its poor condition. The title page, where the publishing date and run would appear, was missing. The issue is that it ISN'T a first (or even a second) edition. It has the wrong cover and is actually a later run that just had a rough life. I know Dad knew this. The information is easy to find, and I'm pretty sure he cut out the title page so he could pass it off as what he said it was.

of reasons — but he keeps Happy Halloweeeeen! bragging about what a great gift it was. Should I say something the next time he brings it up? Having the lie hanging out there feels uncomfortable. WONDERING IN THE EAST

DEAR WONDERING: Be kind. Just thank your father again and resist the urge to tell him you know he is fibbing. If you suspected he had been taken advantage of by a bookseller, I might have answered differently and suggest you warn him about doing business with someone who is unscrupulous. However, because you stated that he's experienced, I hesitate to advise you to put him on the spot.

DEAR READERS: It's Halloween, a time for fun and fantasy! I hope that any cele-I don't know why he did this be creative, fun AND SAFE tion that's asked.)

State needs to invest in its people

By MORTON J. MARCUS

Frequent readers of this column know Indiana's economic development is a major concern. Recently, I asked five regular luncheon mates, "Where should Indiana put its money for economic development?"

I expected the usual three answers to that question:

a) Where the market is currently growing,

b) Where the market has a good chance of restoring economic prosperity, or

c) Where the market has abandoned communities we call "rural" and where significant public and private infrastructure is decaying.

Objections to and justifica-

Morton J. Marcus

the market has favored Indianapolis and its hostile suburbs with an abundance of opportunity over the past several decades. This has led to persistent envy from other Indiana cities and counties, which then conspire to deny that struggling metropolitan area relief from its diseconomies of scale.

Through both neglect and tions for each alternative are active disdain, the General readily available. For instance, Assembly has made Indianapo-

lis and its suburbs congested, ers in Indiana, have had major activities, institutions and interincreasingly polluted, inefficient and disrespectful competitors for whatever goodies are available near the bottom of the development barrel.

However, the laissez-faire, dowhat-ye-will policies of our state government have failed other metro areas and smaller cities as well. Almost all development dollars come from the federal government, and they have often been administered by state legislators and bureaucrats ignorant of the capabilities and limitations of our diverse localities.

If you doubt this assessment, look at the decades of "progress" in Terre Haute and the Three Sisters of U.S. 24 — Logansport, Peru and Wabash. All four of those cities, like oth-

highways built around their downtowns, leading to decay of the central city and delayed modernization.

Finally, consider our "rural" areas. They subsist by happenstance, at the will of foreign companies that grace us with their investments. Subsidized extensively by a fawning state development agency, these firms benefit from local governments cajoled into giving away tax money that supports education, protective services, health care and numerous other functions.

Then we proclaim, "Nobody wants to live in a place as dull as Knox, Linton or Crothersville.' But none of these towns would be decaying or dull if counties would join forces and develop

actions that take advantage of modern transit and technologies ones that can liberate the mind and spirit.

At that lunch, I was surprised by the first response to my question: "Invest in the people." Forget subsidies to business. Help our citizens understand that what lies beyond our selfimposed boundaries is attainable. Watch TV that is meaningful and read books. This will stimulate imagination and independent action. Ultimately, people will yield the best return on our investments.

'State capitalism' is destined to fail

Bloomberg Opinion

Tribune News Service Call it industrial policy, state capitalism, oldfashioned socialism: It's a bad idea. Across several recent administrations. the U.S. government's role in the economy has grown increasingly intrusive. The current White House has taken things to an extreme. It's a tried-andfailed experiment that should be scrapped before it does any more harm.

Citing a variety of goals protecting national security, bolstering supply chains, boosting domestic manufacturing the administration has been giving itself "a piece of the action" in company after company.

So far, it has taken a 10% stake in Trilogy Metals Inc.; a \$400 million chunk of MP Materials Corp.; a possible 5% share of Lithium Americas Corp., along with a cut of its Thacker Pass project; a "golden share" in United States Steel Corp.; and a 10% piece of Intel Corp. It has also offered exportcontrol exemptions to Nvidia Corp. Advanced Micro Devices Inc. in exchange for 15% of the resulting revenue. The president has mused about more such deals to come.

experience show the of such perils intervention. Outside of genuine emergencies, it is to lead misallocated resources, growth, less slower dynamism and more rentfrom seeking. Far strengthening domestic industry, it will favor incumbents over startups, delay needed reforms and restructurings, and invariably prioritize politics over productivity. It's a formula for stifling innovation and enfeebling the competitive spirit.

"state Unfortunately, capitalism" is fast becoming formal policy in numerous respects. One recent analysis found that the U.S. now doles out nearly \$200 billion in subsidies for direct favored businesses each year, thanks partly to the splurges from Infrastructure Investment and Jobs Act, the Chips and Science Act, and the Inflation Reduction Act.

largesse This may faltering support companies or satisfy political constituencies but over time it will likely invite corruption, waste dollars and sap ambition.

Guest **Opinion**

In the same spirit, the president has imposed an expansive tariff regime, affecting trillions of dollars in trade, in hopes of reshaping the economy according to priorities. At nearly 19%, by one estimate, the U.S. average effective tariff rate is now higher than at any time since the 1930s. Such duties will not just raise prices, slash output and erode real wages, they'll also shield domestic companies from the effects of global competition.

To say the White House is picking winners and losers, then, would be an understatement. It offers ad hoc tariff exemptions for the politically pliable. props up favored factories with make-work jobs. It provides a "concierge approach" to jobs. fossil-fuel permitting while all but outlawing wind projects. Its more distinctive ideas sovereign wealth fund, a strategic Bitcoin reserve, manufacturing "investment vehicle" thinking: Where capital is concerned. the

government knows best. Time was, Republicans opposed such intrusions, and rightly so. They're antithetical to American capitalism. If the U.S. continues down this path, expect ever-changing rules, unbridled lobbying, exemptions exceptions for the wellconnected, and perpetual uncertainty for any company hoping to make an honest investment. Rather than competing on the merits, business leaders will need to get wise to the ways of Washington.

If it wants to boost the economy, the administration should stop helping itself to equity stakes and instead focus on basics: prudent sound regulation, infrastructure, top-notch research, pro-growth tax reforms and perhaps a modicum of stability in Washington. It should remember that the U.S. economy became the wonder of the world thanks to free markets and vigorous enterprise, not central planning.

Early detection saves lives

By WENORA JOHNSON

Chicago Tribune Tribune News Service

After surviving three types of cancer and having to face the harsh realities of colorectal and endometrial cancer and basal cell carcinoma, I know just how crucial early detection can be in saving lives.

My cancer journey has been an all reflect the same also strengthened my resolve. It has inspired me to become an advocate for cancer patients, to educate others about the risks of hereditary cancers and to promote tools such as genetic testing that enable individuals to take control of their health before it's too late.

When I was first diagnosed with colorectal cancer. I started to understand my family history and how genetics influenced my health. But it wasn't until I tested positive for Lynch syndrome, a hereditary condition that greatly increases the risk of colorectal, endometrial and ovarian cancers, that I realized the extent of my predisposed risk. That diagnosis completely transformed my life, and I was forced to equip myself with the tools I needed to stay ahead of the disease. Now, I hope to do the same for others who might not be aware of their own

While Lynch syndrome doesn't guarantee a cancer diagnosis, it certainly increases the risk of one (or multiple, in my case). What it does guarantee is the need to stay proactive and vigilant about your health, something I think everyone, Lynch syndrome or not, should practice. We must take charge of our own health, empowering ourselves with information, discussing our health risks with our doctors, and staying up to date on recommended checkups and tests, including routine cancer screenings.

Wenora **Johnson**

The deadliest cancers in Illinois are those of the lung, colon/rectum and prostate. These three cancers account for over half of all cancer deaths across our Prairie State. The good news is that these cancers also all have preventative screening tests available that can find cancer before any symptoms arise and treat pre-cancers and cancers early, before they have a chance to spread.

Having battled against and survived colorectal cancer, or CRC, I can attest to just how vicious it can be. But despite its high mortality, early-stage CRC has a remarkable five-vear survival rate of 91%. And for endometrial cancer, the survival rate is 81%, increasing to 95% when the cancer is detected before it spreads beyond the uterus. These numbers highlight just how transformative regular screening and early detection can be.

Cancer screening technology has also come a long way in the past few decades, with innovative advances such as 3D mammography and lowdose CT scans for lung cancer. One of the most significant developments in cancer detection has been the emergence of noninvasive, blood-based tests that eliminate the perceived inconvenience and discomfort of some traditional screening methods.

Recently, the Food and Drug Administration

approved the Shield test, the first Medicare-covered blood test approved as a primary screening for CRC. While genetic testing can iden- in the Chicago area.

tify those of us at higher risk for developing cancer, tools such as the Shield test offer an easier and less invasive option for early detection of CRC among average-risk individuals, representing an encouraging step forward in increasing accessibility for millions who might otherwise go unscreened. The test is also now covered for fellow veterans receiving community care benefits authorized by the U.S. Department of Veterans Affairs.

It's important to note that tools like the Shield test don't replace other screening methods such as colonoscopies or stool-based tests, or genetic testing for individuals with hereditary risks, and they are not intended for those who have Lynch syndrome and are high-risk.

But they are valuable additions to a broader tool kit in protecting our public health and a way to improve the early detection of CRC and hopefully save lives. If such tools had been available to my grandfather and brother, both of whom tragically lost their lives to CRC at ages 38 and 47, respectively, there is a very real possibility they could still be here today. Early detection through screening is often the difference between life and death, and without access to these lifesaving methods, their cancers went undetected until it was too late.

My advocacy has always focused on empowering patients to become their own best health advocates. When we understand our risks through family history and genetic testing, we can access earlier interventions and make better decisions for ourselves.

Cancer doesn't wait, and neither should we.

Johnson is a three-time cancer survivor and a Navy veteran who lives

Beef plan raises questions

Industry leaders push back on call for lower prices

By CHRISTOPHER VONDRACEK, JP LAWRENCE and SYDNEY KASHIWAGI

Tribune News Service

SLEEPY EYE, MINN. — At the Sleepy Eye Auction Market last week, between sales of fattened steers and a shaggy Highland bull, chatter drifted to farm country's latest beef with the White House: President Donald Trump's plan to more from Argentina.

Few at the southwestern Minnesota cattle auction barn thought it would make a dent in grocery prices for families. But that didn't mean they wanted to criticize Trump.

'The economy is what's going to affect the cattle market more than anything," said Dean Ibberson, a 50-year cattle industry veteran. "We have to have enough people having jobs that can afford to buy the beef at the high prices. ... If we lose that market, then that's what's really gonna hurt.'

But a much more vocal, widespread and bipartisan backlash has erupted among leaders of cattle industry trade groups and politicians in Washington, D.C., to both Trump's comments about Argentina and suggestion that U.S. ranchers should lower

"This plan only creates chaos at a critical time of the year for American cattle producers, while doing

nothing to lower grocery store prices," said Colin Woodall, CEO of the National Cattlemen's Beef Association, earlier this week.

The beef cattle issue has become partisan. The Trump administration deal on financial currency swaps with Argentina might provide a boost of up to \$40 billion at a critical time for the country's president, Trump ally Javier Milei, ahead of midterm elections there.

Argentina has dropped tariffs to increase soybean sales to China. Those orders replaced those from the U.S. producers, especially Minnesota where soybeans until this year have been the state's largest export.

Former Minnesota Demo cratic congressman Collin Peterson, who served as longtime chair of the agriculture committee, said he can't fathom the administration's rationale.

The people that know anything about this know that it's not a good idea to be importing beef from [Brazil and Argentina] for a lot of different reasons, Peterson said. "And it's not a good idea to offset the marketplace in China for soybeans.

On Capitol Hill, the ranking agriculture committee Democrats — Minneso-Sen. Amy Klobuchar and Rep. Angie Craig — also lambasted the Trump administration in interviews Wednesday.

"Talk about a royal screw-up," Klobuchar said.

Craig said she had 25 to 30 farmers in her office last week, describing the rage farmers feel about the White House as "overwhelming." Eight Republican mem-

bers of Congress sent a letter to Trump on Tuesday asking for more information on his plan to import Argentine beef, according to Reuters.

"[We] urge your adminis-

Tribune News Service/The Minnesota Star Tribune/Renee Jones Schneider

Cattle up for auction at the Sleepy Eye Auction Market in Sleepy Eye, Minnesota. The Trump administration's currency-swap deal with Argentina and President Donald Trump's suggestion that U.S. ranchers should lower prices have led to widespread, bipartisan backlash among cattle-industry trade leaders and politicians in Washington, D.C.

tration to ensure that any future decisions are made with full transparency, sound science, and a firm commitment to the U.S. cattle industry," said the letter, led by Rep. Julie Fedorchak of North Dakota.

Reps. Brad Finstad and Michelle Fischbach, both Republicans represent Minnesota rural districts, did not respond to requests for comment.

In Sleepy Eye, at least publicly, the criticism of a president largely beloved in Minnesota's cattle country was more subdued.

As feeder cattle trotted the barn, Gary Roiger held up his thumb to bid. His wife, Patricia, cradled their granddaughter, Stately, who was named after Stately Township in Brown County, where the family has 2,000 cattle.

The Roigers said they hope Trump's plan will include labels on imports from Argentina.

"Let the consumers released a plan Wednes-

decide if they want to eat day across agencies that it American beef," Patricia Roiger said.

Eating beef has become increasingly expensive for Americans. Ground beef has risen from \$5.54 a pound in January to \$6.31 a pound in August, according to the Federal Reserve Bank of St. Louis.

Even prior to Trump taking office, beef prices were historically high. The national cattle herd remains small because of drought, disease and high feed costs, among other rea-

sons. Wednesday morning, Trump posted to Truth Social that cattle ranchers were "doing so well" for the first time in years because of the 50% tariff he placed on Brazil. He also said in that post that U.S. ranchers need to lower the price of their cattle "because the consumer is a very big factor in my thinking, also!"

His administration

said would boost the U.S. cattle supply, including exploring the expansion of grazing on federal lands and increasing payments in some livestock programs, according to Reuters. It also includes enforcing compliance of voluntary "Product of USA" claims on beef prod-

Some have blamed corporate consolidation in the beef-packing business for high prices. Boyd Kesler, a cattle buyer at Tyson Foods, who sat front and center at the auction in Sleepy Eye, said it has been tough for his business, too.

"Profitability has not been good for the packers," Kesler said. "But the guvs that are feeding have done pretty well.'

A 2,400-pound cull bull, an older animal removed from the herd, sold for \$1.75 a pound on Wednesday. The auction house

said that's double what the owner would have gotten five years earlier.

Samantha Ediger-Johnson, the Sleepy Eye auctioneer, shook her head at

the market's rise. "It has been crazy to watch this market do what it's been doing," she said. Other cattlemen said

that while beef prices are high, the prices to run their farms have risen too.

Analysts say Trump's Argentine beef buy could be more political than practical at driving down costs. The South American country is the eighthlargest supplier of beef to the United States, far lagging Australia, Canada and Brazil, the biggest sources of beef imports.

"[There'll be] almost zero impact on price at the grocery store," said Eric Mousel, a beef systems management specialist with the University of Minnesota's North Central Research and Outreach Center in Grand Rapids, Minn. "Imported beef is really just used in the production of hamburger and won't have much influence on total industry output."

Last year, the United States imported more than 4 billion pounds of beef, a record high and dramatic increase from just two years earlier.

Minnesota is 10th in the nation for beef production, with roughly 18,000 ranchers and farmers scattered across the state, from feedlot operators concentrated in the southwestern prairies to cow-calf ranches farther north.

Gary Roiger said he knows some older farmers getting out of the market because they're afraid that if beef prices crash, they'll be too old to wait for the recovery. They'll have to wait, he said, to see if whether Trump who ran on an Americafirst platform — is serious about importing more foreign beef.

Soybeans surge as talks spur trade hope

By MICHAEL HIRTZER, HALLIE GU

and BEN WESTCOTT

Tribune News Service

Soybeans and other crops soared as progress in negotiations between the U.S. and China lifted hopes that the world's two largest economies were edging toward a deal in their protracted trade war.

2.8% in Chicago, reaching the highest since July 2024. That came after U.S. Treasury Secretary Scott Bessent said China would make "substantial" purchases of the oilseed under a pact the two countries are close to finalizing. Wheat jumped by the most since Aug. 12.

trade Agricultural was

Crop futures hit their highest point since July 2024

tors said they came to terms on Soy futures rose as much as over the weekend, setting the table for leaders Donald Trump and Xi Jinping to finalize a deal and ease tensions that have rattled global markets. The two are expected to meet later this week in South Korea on the sidelines of the APEC summit.

Soybeans have been a central point of tension between the two agricultural giants. China, among a range of issues that the world's top importer of the

gaining chip in its trade war with the U.S., shunning shipments from its second-largest supplier, and turning instead to South America for record imports. U.S. farmers, suffering from financial strain as their top consumer walked away, have urged Washington to reach an agreement with Beijing.

Data from the U.S. Department of Agriculture on Monday showed weekly American soy American and Chinese negotia- crop, has deployed it as a bar- shipments of about 1.06 million copia Agri Analytics strate-

and into next year, before Brazil starts harvesting what's estimated to be another record harvest.

"China has yet to secure much of its soybean supply for December and January," Total Farm Marketing analyst Naomi Blohm said in a Monday note, estimating the country's potential needs in those months of 8 million to 9 million tons.

Others see limited room for new U.S. sales in the months ahead.

'Because China has bought a lot of soybeans out of Brazil and Argentina, its near-term need is modest," said Cornu-

tons, down 33% from the previgist Tobin Gorey. "But where we ous week with nothing loaded should see it is a pick-up in forward sales at some point. The Some analysts are bullish on issue for the market now China's demand for late 2025 down to timing, rather than size.

On Monday, the Chinese Communist Party's official mouthpiece called on the world's biggest economies to "jointly safeguard hard-won achievements" from their latest trade talks, but stopped short of confirming plans to renew purchases of U.S. soybeans.

Still, the warming of trade relations was welcomed after the dispute has clouded markets all year.

"No hard fast deals have yet been signed, so things could still fall apart. But optimism rules the day," StoneX chief commodities economist Arlan Suderman said in a note.

Contract By Steve Becker Bridge

Bidding quiz partner might have four spades and four hearts, or four spades and five hearts — takes precedence over a two-club bid or a direct raise in hearts with only three-card support. There is a good chance you will get to show your three-card heart support at your next turn, depending on what partner does in response to your one-spade bid. 3. Two diamonds. This is a "reverse," indicating 17 or more points as well as at least five clubs and four diamonds. You plan to show your heart support next to identify your shortness in spades. As opener, whenever you bid a

You are South, and the bidding South

What would you bid now with each of the following four hands?

1. ♠ 7 ♥ Q93 ♣ K985 ♣ AKJ63

2. ♠ K198 ♥ Q93 ♠ AK87 ♣ AKJ63

3. ♠ 6 ♥ Q93 ♠ AK87 ♣ AKJ63

4. ♠ AJ5 ♥ Q93 ♠ K6 ♠ AKJ63

1. Two hearts. Judgment is said to be the name of the game, and you are certainly put to the test in this case, which poses a difficult choice

between two reasonable rebids. You could bid two clubs because you think it important to identify your good club suit and at the same time avoid an immediate raise in hearts with only three-card trump support. Or you could bid two hearts because it comes closer to describing the nature of your hand than a two-club bid would. While it is true that a direct raise of partner's suit is usually based on

four cards rather than three, over the long haul the single raise in a major on three to an honor and an unbalanced hand will produce a better result than rebidding a fivecard minor suit.

For those who might have considered two diamonds as a possible

rebid, see No.3 below.

2. One spade. No other bid should seriously be considered. The search for a 4-4 major suit fit —

10-31

identify your shortness in spades.
As opener, whenever you bid a new suit on the two-level that ranks higher than the suit you opened with, you indicate well above a minimum opening bid and also imply that you hold greater length in the first-bid suit. One advantage of a "reverse" bid is that you can show a strong hand without making a jump-rebid.

4. Two notrump. This rebid shows 18 or 19 high-card points and balanced distribution (no singleton or void, and not more than one doubleton). It describes a hand that was too strong for an opening onebleton). It describes a hand that was too strong for an opening one-notrump bid and not strong enough to open two notrump, Responder is then in an ideal position to judge what is likely to be the best final contract. Two notrump is not foreing, but in practice the responder seldom passes.

Will(mann) to win

Junior middle helps Tribe gut out regional semi win over Arcanum

By ANDREW BALKO

The Commercial Review CLAYTON, Ohio — The Indians swept the Trojans during the regular season.

They weren't so lucky in the postseason as they dropped a set for the first time in four matches.

It didn't get them down.

Keeping their heads up and confidence clear, they are headed to a level not reached since well before they were born.

Fort Recovery High School's volleyball team took down the top-seeded Arcanum Trojans 25-20, 21-25, 25-21, 26-24 in the OHSAA Division VI Regional 24 semifinal hosted by Northmont on Wednesday.

'Positive affirmation is what my team thrives on," said FRHS coach Travis Guggenbiller. "I just kept telling them, 'You're doing everything you're asked to do. We're making those steps. Keep fighting. Keep pushing. Keep pushing. Keep pushing.' ...
"That positive affirmation,

it's just been huge for this group of girls and we keep thriving on that. I'm just awed and I'm so proud of them."

The second-seeded Tribe moves on to play its neighbor, No. 2 St. Henry, which is another top seed, at noon on Saturday at Northmont. This is just the third time Fort Recovery (14-12) has sent a volleyball team to the regional final. The first was in 1990, when it went on to win the state championship. FRHS also made the regional final in 1991 with just two semifinal appearances in between that year and the upcoming match.

When asked about bringing the Indians to their first regional final in 34 years, Guggenbiller could barely choke out one word in response.

"Speechless."

Willmann and Alexis Grisez, carried the bulk of the load. They combined for 20 of the team's 44 kills and five of seven blocks. Willmann led the Indiand one block assist — while also dropping in two aces.

Brynn Willmann of the Fort Recovery High School volleyball team gets a block on The Tribe's middles, Brynn Arcanum's Caroline Long at Northmont on Wednesday during the OHSAA Division VI Regional 24 semifinal. Willmann led the Indians with 13 kills and five blocks in the 25-20, 21-25, 25-21, 26-24 victory that earned their third regional final appearance and first since 1991.

ans in both categories — she blocking a lot in practice and were out of system." we were really just putting it came in timely fashion. She row.

"We've been working on away and making sure they won the ball back from

Arcanum (20-6) 14 times, had 13 kills, four solo blocks being effective on our serve Along with putting up big including six when AHS had receive," Willmann said. "So numbers, Willmann's points scored two or more points in a

"I usually take a deep breath and make sure I'm calm," Willmann said. "I know that when I get in, I have to help my team overcome those challenges, so I just place (the ball) and then we move on to the next play.'

Willmann earned at least one pivotal point late in each of the three sets FRHS won. In the first, she attacked a ball off a Trojan blocker to end a sevenpoint run to tie the set at 18. Her third-set moment came when she blocked Kamryn Beisner to end a long rally and followed it up with another kill to go up 23-19. She also had backto-back points late in the fourth set with a soft redirect kill and a ball she pushed to the left sideline for a 22-20 lead.

The Trojans didn't back down, as they reached 20 in all four sets after no team had made it past 16 against Fort Recovery in the district. That second set was fueled by a pair of runs that had Beisner (12 kills, three aces) serving, Cameron Garbig and Grace Fry with her in the back row, Grace Psczulkoski (15 kills) at outside hitter, Carolina Long (17 kills, two blocks) in the middle and Avery Leeper (three kills) at outside. Garbig is the only junior from that group, while the others are seniors.

"When we have five seniors on the court, it just clicks differently," said AHS coach Jacie Holman. "That makes a huge difference. These seniors really wanted that set and that's really what made the difference in that one moment.'

FRHS is now set to face Midwest Athletic Conference runner-up St. Henry for the opportunity to make it to state. The schools, which are separated by less than 8 miles, previously met on Oct. 19, in a match in which SHHS held the Indians to just 15 kills in three sets.

"We have to go out there and play MAC volleyball," Guggenbiller said. "We've got to go out there, we've got to block, be aggressive, we've got to communicate. We've got to go out and have fun and believe in our abilities that anything can happen."
