School board hires Corwin

JCHS grad will be new transportation director

By RAY COONEY

The Commercial Review Jay School Corporation has a new leader for its transportation department.

Jay School Board during a special meeting Thursday approved the hiring of Mitch Corwin as transportation director.

The 1992 Jay County High School graduate will take over for Melissa Stephen, who submitted her resignation earlier this month. Her last day will be today.

"This is a big win for the schools here," said Jay Schools superintendent Jeremy Gulley. "Our transportation is complicated and it's getting more so ... We need good people out there."

He touted Corwin's experience both as the current assistant transportation director for New Albany-Floyd County School District and as a former Jay School Corporation employee. He served as a bus technician for Jay Schools from 2011 through 2018.

Corwin's first day in his new position will be Oct. 23. Josh Nibarger will fill in as interim transportation director between Stephen's departure and Corwin's arrival.

In addition to his work the last four years for New Albany-Floyd County, Corwin has also been an adjunct instructor for Ivy Tech Community College and a parts manager for AutoZone.

Stockpile considered

By LESLIE BONILLA MUNIZ

Indiana Capital Chronicle indianacapitalchronicle.com

Indiana is "seriously considering" creating its own stockpile of critical medical supplies after struggling to get stock from the Strategic National Stockpile during the Covid-19 pandemic, former State Health Commissioner Kris Box said Wednesday.

And Indiana Gov. Eric Holcomb said he lost no sleep over his pandemicera policy choices — mitigation measures that earned him praise from other states' health and political leaders Wednesday but backlash from some Hoosiers concerned about government overreach.

Box, Holcomb and other key figures spoke during an Indianapolis meeting of the Bipartisan Commission on Biodefense. The group formed in 2014 to assess and improve the nation's capacity to defend itself from biological threats.

There's a new vaccine available for the latest variant of Covid-19, and a new

Indiana is looking at keeping its own cache of critical medical supplies

home tests — courtesy of the federal government to go along with it. Holcomb received his flu and Covid-19 shots Wednesday, according to his official X account.

But for Box, who led Indiana's health apparatus for more than five years until this May, the tests are a reminder of one way Indiana struggled during the pandemic.

"I think it's a perfect example of where the federal government decided to amass those quick tests at the federal level so that they would be able to push them out," Box said. "... And we were using them to screen people at these mass-testing sites, and the

round of free, rapid at- sites that we had all over. And all of a sudden, our suppliers could no longer give them to us because so many were going to the federal government.

That forced the state to run more lab tests results take days rather than minutes — which Box said delayed quarantines and medication referrals. She also said Indiana struggled to get swabs, viral transport medium and other supplies.

When Indiana receive equipment from the Strategic National Stockpile, it was "oftentimes" out-of-date, according to Box — although she noted, "We used it anyway, of course."

Budget

Continued from page 1

Council member Matt Minnich noted earlier this month the cuts would put \$240,000 in the fund for next year, giving \$140,000 for a contract with Jay County Development Corporation and \$100,000 for a contract with East Central Indiana Regional Planning District.

Wednesday on a 5-1 vote, with council member Harold Towell dissenting and Minnich absent.

Towell later explained he had not agreed to several items in the budget and felt he couldn't approve the budget with that in mind. (In the past few months, Towell has questioned various aspects of the budget, most notably the commission-

associated with employee raises and increasing the fund for animal control with Jay County Humane Society to \$66,325. He also voted in favor of cutting Jay County Country Living's budget in half, but the motion did not pass.)

Council also approved an ordi-Council approved the budget nance Wednesday adjusting local income tax rates.

The ordinance adds an emergency medical service rate of 0.15% and reduces the certified shares rate to 1.25%. (Jay County auditor Emily Franks suggested the change, which essentially relocates a portion of property tax dollars into the county general fund.) As of 2022, it's an option for county

ers' fund. He dissented in votes fiscal bodies that provide emergency medical services for all local units in the county and pay 100% of the costs to provide those servic-

> Also, per state law, the county had to adjust its property tax credit allocation categories and remove the qualified residential property tax credit. In an effort to keep tax credits nearly the same, the county put approximately 60% of the proposed revenue for property tax credits into the 1% allocation type category and 40% into the residential property category.

The adjustment will put an extra \$400,000 in the general fund budget. Council member Cindy Bracy noted the adjustment acts as a hump.'

temporary solution to the county's deficit budget. (Several funds are continuing to operate in deficit in 2024, including the county general fund at more than \$391,500 deficit.)

'That allows us to operate on less of a deficit, which is nice, but we still don't have a solution for making more money yet, right?" she asked.

president Jeanne Council Houchins said Jay County would need to raise its assessed value. Bracy added the county would benefit from having more residents and more people working here and paying taxes.

Franks added the adjustment "gets (Jay County) over the

Hires

Continued from page 1

Prior to his seven years with Jay Schools, he was a heavy truck technician for Moser Motor Sales for about a year and assistant pastor at Fellowship Baptist Church for four years.

School board members Ron Laux, Donna Geesaman, Vickie Reitz, Jason Phillips, Marcie Vormohr and Chip Phillips unanimously approved his hiring. Phil Ford was absent from the meeting. Vormohr said she had a bus driver

approach her recently to say she hoped Corwin would be hired for the

"He worked for us before and had a good rapport with us all," said Laux. "He's a great guy."

Corwin earned a technical degree in automotive technology from the University of Western Ohio, a diploma in Biblical studies from Liberty University and an associate's degree in Christian ministries from Indiana Wesleyan University.

In addition to welcoming Corwin, Gulley expressed well wishes for Stephen and thanked her for her work as transportation direc-

She has held the position for about five years.

Also Thursday, Gulley asked board members to plan for an executive session Oct. 16 prior to its 5 p.m. regular meeting and a special meeting Oct. 23 to discuss and then vote on an agreement with Jay Classroom Teachers Association. He said a tentative agreement is in place, adding that collective bargaining with the teachers' union went smoothly.

JCTA is scheduled to vote on the agreement ahead of the school board's Oct. 23 special meeting.

Considered

Continued from page 1 Box said Indiana is "seriously considering" launching a state-level stockpile. Hoosier leaders, about the prospect.

She favored a regional approach, with multiple stockpiles dedicated to specific areas of the state.

The Indiana Department of Health didn't immediately respond to a request for comment.

Holcomb received glowing praise from commission members — all forcountry — for his leadership at the height of the pandemic and his post-crisis efforts to better fund public health.

That's despite significant pushback from other Hoosier leaders, everyday residents.

Former U.S. Food and Administration Drug Commissioner Margaret Hamburg told Holcomb he "seemed remarkably able to maintain public trust and confidence," when other states and countries experienced a "denigra-tion of public health expertise."

Holcomb emphasized

the importance of listening to experts and being transparent.

But to reporters, he later said, "I don't have any she added, have had "significant discussions" regrets because I was operating with the information ating with the information that I had at the time."

"Put yourself in a situation where you have multiple experts not agreeing with one another," Holcomb said. "And then you have to make the decision."

"very comfortable" with his choices, adding, "(I) slept well every night heavy time for our state."

Daughter refuses to communicate with grandmother

DEAR ABBY: My 23-year-old daughter, "Chloe," lives with me and refuses to acknowledge her grandmother's emails and letters, which are delivered to our home. It has been four years since my mother has even seen Chloe. My mother is growing increasingly disappointed and is grieved by Chloe's apparent distancing. (We live 20 miles apart.)

Over the past year or so, I have calmly asked Chloe to reply to her grandmother's kind emails and letters. She generally hears me out and then turns and walks away. I have a close and loving relationship with my mother. To me, she's the world's greatest mom and grandmother. I also have a warm and loving relationship with my daughter. There's little that I wouldn't do to ensure her a safe and comfortable home, a good education and, in general, items that aren't unreasonable.

My problem is, I am starting to feel caught in the middle of this widening communication gap.

Dear Abby

It's embarrassing when I'm at family get-togethers because Chloe stopped attending any family gatherings years ago. Obviously, something has driven my daughter to refuse to acknowledge her grandmother, and for that matter, the rest of our extended and very large family. How do I break this proverbial ice? — DAD IN THE MIDDLE IN

DEAR DAD: Your daughter is an adult. She, not you, is presumably responsible for her own behavior. I don't know what happened four years ago that caused Chloe to withdraw, not only from wife is doing, I tend to respond,

the entire clan, and neither do you (or you would have mentioned it). Step out from the middle, Dad, and let your daughter deal with the fallout from having excommunicated the entire family. You can't fix this. Only Chloe can do that.

DEAR ABBY: Twenty years ago, my wife was diagnosed with a life-threatening health issue. We both rebounded from it and have had a good run. Over the last three years, though, her health has turned south again. She has heart, lung, liver and stomach issues that prevent her from being active. Most of her time now is spent just sleeping or sitting. She cannot walk farther than 20 feet without becoming exhausted, and this is with supplementary oxygen. She has other issues as well.

When people ask me how my

her grandmother but also what I consider to be humorous- not, I'm asked to move down a ly but also pragmatically, "Well, I haven't buried her yet." But when I do, people become offended. Most of them don't realize we deal with this every day, and I have no desire to recount every detail of her problems to satisfy their curiosity. At the same time, I realize most are asking out of genuine concern. Is there a better answer? — WISE GUY IN answer? **FLORIDA**

DEAR WISE GUY: I think so. Try responding, "She's doing as well as can be expected," or "Her condition hasn't changed; I will tell her you asked after her," and then change the subject.

DEAR ABBY: Is there a rule of etiquette for changing seats in a bar setting? I enjoy going out to eat occasionally and, when I do, I like to sit at the bar and eat while having a drink. It

seat or two to accommodate another two or three people. Depending on my mood, I may or may not do it. Since this happens to me quite frequently, I am declining more and more often. Either way, I think it's rude to ask a stranger to move just so the other party can have enough seats. By the way, I have moved out of courtesy if I am not eating, but to ask me to move while I'm eating is unacceptable. Your thoughts? — IN PLACE IN KENTUCKY

DEAR IN PLACE: I realize that some people may not agree, but I don't regard politely asking someone to move down a couple of stools at a bar as an unforgivable intrusion. The gracious response to that request would be to accommodate the larger party, as long as you are not required to move away from the bar. I would seems lately, more often than have no problem doing it.

Use data to negotiate drug prices

Bloomberg Opinion

The Inflation Reduction Act, passed last year, gave Medicare the authority to negotiate drug prices for the first time. The government will start with 10 medications, which were announced last month. Now it just needs to figure out how much they should cost.

Congress When created Medicare's prescription-drug benefit in 2003, it prevented the government from haggling with drugmakers — a coup for the industry. Medicare's new powers are forecast to reduce out-of-pocket costs for seniors and save nearly \$100 billion over a decade. For consumers accustomed to paying the highest drug prices in the world, that's unequivocally good

Yet the government needs to strike a careful balance. The goal should be to push prices down

Guest **Editorial**

ments. With this in mind, the law directs Medicare to find the "lowest maximum fair price" while 'appropriately rewarding inno-

Officials have spent months laying out in painstaking detail how the negotiations will proceed. Nowhere do they explain how Medicare will come up with a "fair price."

Many other countries have solved this dilemma using what's called cost-effectiveness analysis, a quantitative method applied regularly within the pharmaceutical industry and by government negotiators to determine how while preserving incentives to much a drug should cost. Costdevelop new and better treat- effectiveness seeks to weigh the

health benefits of a treatment to meddle in the business of pric-Medicare won't be so straightforagainst its price. It can help ing drugs. Most other markets ward. With QALYs banned, it health officials with limited resources answer difficult questions such as how much a vaccine should cost during a pandemic, or whether a new Alzheimer's treatment is worth its \$26,500 price tag. For the coming negotiations, it would determine if a drug delivers sufficient health benefits for seniors while offering taxpayers good value for their money.

One might think such an objective would be central to the IRA. In fact, the law explicitly bans the most common cost-effectiveness metric — so-called quality-adjusted life years, or QALYs — from negotiations. Certain interest groups had complained that QALYs discriminate against people with long-term illnesses or disabilities (on the dubious rationale that "sick" years are assigned lower scores than "healthy" ones). The pharmaceutical industry, for its part, doesn't like the government using QALYs

ing drugs. Most other markets don't need regulators armed with formulas to determine how much products should cost, the argument goes.

Yet the prescription-drug market is different. Patients and providers don't make decisions about whether a treatment offers good value — middlemen do. These intermediaries, which design prescription-drug coverage and negotiate discounts for health plans, get bigger fees for more expensive medications.

As a result, payers like Medicare can't be sure they're getting a good deal. Other countries including Australia and the U.K. don't have such middlemen because a single negotiator — the government — can press manufacturers for discounts. They regularly use cost-effectiveness assessments and, unsurprisingly, their prescription-drug spending is a fraction the U.S.'s.

Unfortunately, the process for

will need to use other (less tested) methodologies. Even so, effective alternatives exist, including some that have been developed to minimize the disparities that disability advocates cite. Medicare should embrace these metrics and be transparent with the public about its pricing methods. A quantitative framework is the clearest, most predictable way to achieve the IRA's goals, not least because it rewards innovation by giving high marks to expensive yet very effective drugs.

It could also minimize rising legal objections to the concept of a "fair price." The provision to negotiate drug prices could be one of the most valuable parts of the IRA, but it will only work if drugmakers and taxpayers trust the results.

A more data-driven, transparent process is critical to making that happen.

Arguments have become too long

By CHAD FLANDERS

The Baltimore Sun Tribune News Service

Supreme Court oral arguments have gotten too long. How do I know this? It used to be that during one of my longer morning runs, I could listen to an entire Supreme Court oral argument. Now, that's getting harder and harder to do. I end my run, and the argument is still going. So I listen to it while I make breakfast. Then I listen to it on my way to work. And if there's still time left to go — and there often is — I listen to it as I fall asleep that night. As a result, Justice Samuel Alito's questions sometimes haunt my

We are far from the days of the one-hour oral argument, the rigidly-adheredto standard of the Rehnquist Court and the default of the early years of Chief Justice John Roberts. There are some obvious reasons why oral arguments have gotten longer. COVID-19 led to the rise of sequential questioning. To another off over the phone, Justice Roberts and each would have their (probably justified) worry that male justices were interrupting female justices, and this may also have led to more calling on people and going one by one, so no one's question got left unasked.

But the sequential questioning stayed on post-COVID and through the return to in-person oral argument, and increased activity by women justices (in the first three months of the current term, Justice Ketanji Brown Jackson was the most active justice, according to an analysis published on Scotusblog.com). We now have arguments that routinely last much longer than an hour, up to the marathon affirmative action cases: Each took longer than two hours, and the hour-long oral arguthey totaled nearly five hours of oral argument. But even smaller cases regularly push the two-hour mark. So too with many cases that end up with unanimous decisions.

No one should deny that these are important cases, tutional law and criminal and they merit careful con- law at Saint Louis Universideration by the justices. sity School of Law.

US PS 125820

Chad **Flanders**

But it is not as if the increased time has led to obviously better arguments. Rather, it leads to going down more rabbit holes as justices pursue their pet theory, or end up addressing other justices rather than the lawyers on both sides. The sequential questioning is irresistible to justices who already like to hear themselves talking. And all too often it seems like justices are increasingly not speaking to the argument being made in front of them but to the public, in a bad way. The justices aren't trying to make their positions better understood, but posturing to score points. This is not what oral arguments should be about.

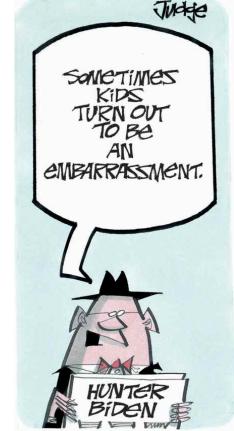

When the arguments go avoid justices cutting one on too long, people (especially my students) stop listening to the whole thing. would call on justices They may just listen to the down the line, in order, argument of one side and rely on sound bites picked say. Then there was the out by the media and by partisans for the rest. But context is important, and listening to the arguments of both sides is important, especially these days.

And keeping oral arguments to an hour had the upshot of focusing the advocates and the justices. You had to get to the heart of the matter, because the clock was running. And frankly, I am less likely now to tell my students to "listen to the oral argument" to help them better understand the because they don't have the time, and the arguments and questions now seem rambling and digressive. I too am starting to give up on oral arguments when they keep me listening past breakfast.

We need to get back to ment. The time expectations were fixed, and both advocates and justices had to work as best they could within that time. And I could sleep better.

of district leaders report having a

facilities plan that factors in climate

change, and a disappointing 4% have

By LISA HOYOS Progressive Perspectives

Tribune News Service

Children across the country returned to school this year after enduring the hottest summer in recorded history, one punctuated by extreme heat and wildfire smoke that kept millions shuttered indoors for days, even weeks, on end. As parents and families seek solutions to the mounting climate crisis, they should embrace the important role that K-12 schools can play in the clean energy

Schools are huge energy consumers. The more than 130,000 K-12 schools in the United States sit on 2 million acres of land and consume about 9% of all the energy used by commercial buildings. Transitioning all schools to 100% clean energy would cut as much carbon pollution as retiring 18 coal-fired power plants.

School buildings can also help communities build resilience to climatedriven disasters. Their gyms and cafeterias are increasingly used as emergency shelters. Pairing solar panels with battery storage can ensure that these shelters are able to maintain power and light, as well as heating or cooling, when power grids

As a climate justice advocate and a mom, I've worked with students and parents from Seattle to Salt Lake City on campaigns to get school boards to shift to 100% clean energy. Many school board members thank us for highlighting all of the ways that their districts can benefit from renewables, including reducing their carbon footprints, saving money on energy bills and preparing for future crises.

Nationally, K-12 schools spend \$8 billion a year on energy costs, their second-highest expense after person-

Lisa Hoyos

energy saves money in the long run, financing the upfront costs associated with installing solar panels or making buildings more energy efficient can be a barrier. Fortunately, two federal laws are

erally underfunded, and while clean

investing billions of dollars to spur the clean energy transition.

Under the Inflation Reduction Act (IRA), schools can receive direct cash payments to finance up to 60% of clean energy infrastructure projects, from solar arrays to geothermal to fossil-fuel-free heating and cooling through heat pumps. The Infrastructure Investment and Jobs Act (IIJA) includes \$5 billion to help electrify U.S. school buses, which constitute the nation's largest mass transit

The U.S. Department of Education has an essential role to play in ensuring that K-12 schools have the information they need to harness the financial resources newly available to them to transition their buildings and buses to clean energy. The agency has relationships with school governance bodies throughout the country and should make sure no stone is left unturned.

There may be tough decisions to make in the clean energy transition, but this isn't one of them. The Department of Education and school leaders in the K-12 sector can demonstrate to young people that their schools will invest in safeguarding

their futures. Hoyos is the National Climate Strategy Director for the League of Conservation Voters and a Public Voices Fellow on the Climate Crisis with The OpEd Project and the Yale Program on Climate Change Commu-

a year just on energy efficiency measures alone. In addition, these upgrades often result in improved lighting, indoor air quality and comfort in classrooms, which in turn enhance student learning. Some forward-thinking school districts and independent schools have already made major gains in switching to clean energy. But as a whole, K-12 schools and districts must do more

set targets to reduce their district's carbon footprints. Schools exist to help prepare young people for their futures. It is indisputable that the climate crisis our children are facing will be even more bleak if the United States fails to meet its target of cutting emissions by more than half of 2005 levels in the next seven years — in parent-speak, by the time today's kindergartners are in sixth grade. The school sector can play an important role in helping to meet our nation's climate goals, while simultaneously educating

young people about climate solutions. To be sure, school districts are gen-

Rice restoration

Anishinaabe are trying to bring back crop to the Great Lakes

By SHERI MCWHIRTER

mlive.com Tribune News Service

BRIMLEY, MI - Wild rice soaked in lake water smells pungent, especially hundreds of pounds of it.

The odor is so earthy it's almost muddy, even a bit reminiscent of barnyard manure.

Yet that smell was no matter to the Bay Mills Indian Community's Biological Services workers and volunteers who spent two consecutive mornings in mid-September slinging handfuls of the rice into either Spectacle Lake on the tribe's reservation, or into Waishkey Bay on Lake Supe-

"Mmmm, that smell, can't you smell that smell," sang Wes Parish, followed by laughter at his own singing of the Lynyrd Skynyrd tune.

Parish, tribal invasive species expert and Bay Mills citizen, was in a kayak on the inland lake Sept. 20, where his technique for spreading the rice proved impressive both visually and by weight class.

'Ūsually, we don't have this breeze and you can use it for your benefit. What I was doing was I was paddling out there and then the wind would push my canoe and I didn't have to paddle. So, I

Tribune News Service/MLive.com/Sheri McWhirter

Molly, 11, and her mother, Tiffany Escherich, throw manoomin into Spectacle Lake on Sept. 20 to help reseed the wild rice beds damaged by Canada geese in the spring.

was throwing it up into the wind tions. and the winds spread and disperses it even more," Parish said.

He went through more of the 100-plus-pound sacks of unprocessed rice than anyone else on the water that morning. The goal was to spread the raw seed harvested from wild rice tribes in Wisconsin and Minnesota to

help rebuild those at Bay Mills. The individual grains of rice are shaped like a torpedo, designed to plummet through the water to the lake bottom and sprout another plant in the spring. Handfuls of rice dropped into the water almost resemble little schools of tiny fish quickly swimming in downward direc-

Wild known rice as manoomin or mnomin in Anishinaabemowin, the native language of the Indigenous Anishinaabe people of the Great Lakes, which includes Ojibwe, Odawa, Potawatomi, and more tribal nations across both the United States and Canada. The word means "good seed" or "good berry."

Manoomin is a keystone aquatic plant that is integral to the Anishinaabe migration story, and the species once grew widespread across Michigan and the entire Upper Great Lakes. But hundreds of years of European settlement removed it from much of the landscape as settlers

acres of natural habitat.

Now Great Lakes like Bay Mills are working to restore wild rice to the ecosystem not only to reclaim cultural heritage but also to build thriving beds of the native species for the future.

Tribal people across Michigan are more frequently seeding, harvesting, processing, cooking, eating, and sharing the wildgrown food at community events and educational sessions as part of a growing native food sovereignty movement.

And Bay Mills was making good progress with its expanding wild rice beds in recent years. That is, until the Canada geese noticed.

Several consecutive years of seeding manoomin at Bay Mills proved productive with more than 15 acres of the rice on Spectacle Lake alone. But large numbers of Canada geese began to eat the tender plants in the spring before they ever polli-

means there is no That manoomin harvest this season at Bay Mills.

'It's an annual plant and needs that seed bank. But what we had was three or four years of goose browse where they basically knocked down every single plant, so nothing went to the seed. So that 15 to 18 acres reduced to about seven acres," said Frank Zomer, Bay Mills fisheries biologist and manoomin program

Wild rice grows in the most pristine waters in Michigan and the Upper Great Lakes region, but only under certain conditions. The species remains susceptible to damage across its life

Manoomin is a delicate plant,

trenched and drained natural particularly in spring during its waterways, destroying countless most vulnerable "floating leaf" phase when the plants only have a single tap root holding them to soft bottom sediments in 6 inches to 3 feet of water.

Zomer said the program's goal is to build up the Bay Mills rice beds large enough that migrating geese and even spawning carp in Lake Superior don't have overwhelmingly destructive impacts on the manoomin beds.

"If we've got a big enough stand of manoomin you can have geese being able to hit the edges, but they just won't get into it. But it's like trying to get up over that hump, right? Trying to throw enough seed to get to that stage,' Zomer said.

The group collectively spread 3,200 pounds of manoomin during the two-day seeding event: 1,400 pounds in Spectacle Lake and 1,800 pounds in the northern part of Waishkey Bay.

Kayla Perron Assinewe, enrolled citizen and cultural coordinator for Bay Mills, said the Anishinaabe people started on the East Coast of North America, but migrated west to the Great Lakes because that's where manoomin grew in such abundance.

"When we were told to travel west, we were told to travel 'til you find that food that grows on water. So, I mean, that is kind of how our entire existence in this area began, right? We were traveling to find that food. And then over time we lost it," she said.

"So, to bring that back to our communities ... it's not just bringing back a food source. It's bringing back all the teachings that go with it and the jobs for each person in the community, like our women are dancers and, you know, all of that is coming back with it, that history and teaching."

Soil sampling program is open

Indiana State

Department of Agriculture Indiana State ture (ISDA) and partners throughout the state have worked with the Gulf Hypoxia Program (GHP) to develop a no-cost prooperations. The program, titled Indiana's Mississippi River Basin Soil Sampling Program, is open

now for applicants.
"Hoosier farmers care deeply about the land and work hard each year to keep their soil healthy,' said Lt. Gov. Crouch, Indiana's Secretary of Agriculture and Rural Development. "This free program is a great way for farmers to test their soil and ensure the proper nutrients are being utilized on their fields.'

management and the principle of the 4R Nutrient Stewardship framework. The 4R framework incorporates using the "Right Source, Right Rate, Right Time, and Right Place" to achieve cropping system goals. The new program focuses on soil sampling and testing because it is a key component, and first step, of developing a plan for nutrient management.

Soil sampling provides an assessment of the soil's fertility which can be used for making fertilizer application recommendations, assessing available nutrients over time, increasing farmer profitability and enhancing environmental protection by reducing the risk of nutrient loss. This project was developed to help further Indiana's State Nutrient Reduction Strategy efforts.

"This free program for farmers will help them assess their land so they can continue to produce as much food as possible with fewer fertilizer inputs. As a farmer myself, I know how critical that is," said Don Lamb, ISDA director. "This program would not be possible without a few incredible partners whose top priority is assisting Hoosier farmers and keeping Hoosier land in great

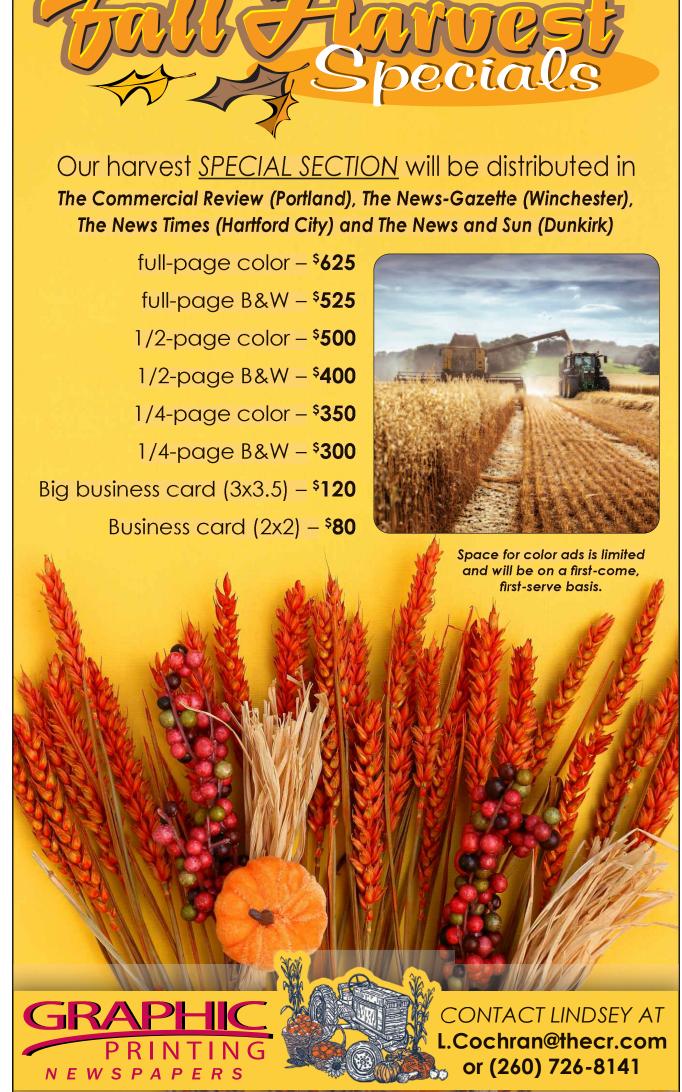

This program includes Department of Agricul- row crop fields, pastures and specialty crops located within Indiana's portion of the Mississippi River Participating Basin. landowners will be priorigram with a focus on tized by fields that have increasing the knowledge never been soil sampled and use of soil sampling and fields that haven't been as a nutrient management sampled regularly (i.e., practice to benefit farm within the last 3-4 years). Further prioritization may be implemented based on interest in the program. This program excludes hobby gardens and private lawns. Interested farmers can sign-up online at ISDA's website or by reachout soilsampling@isda.in.gov.

Sign-ups are now open and ISDA is accepting signups until April 17, 2024.

Paul Hodgen, president of the Indiana Corn Marketing Council, is excited to bring this program to fruition. Hodgen is well ISDA promotes the versed in soil fertility with importance of nutrient a bachelor's degree in agronomy, a master's degree in soil science and a doctorate degree in agronomy and soil fertility.

'Regular soil sampling and testing is a critical part of a nutrient management plan to economically produce a crop," Hodgen said.
"We look forward to working with ISDA and other partners to help Hoosier farmers continue to make informed decisions on nutrient management. Soil testing is a keystone to sustainably producing a crop. This effort will further our goals for nutrient management stewardship across Indiana. This will help us make smarter decisions about where to apply nutrients and to spread that data across more acres. This program will be a great way to increase the number of farmers who better understand their soils, and it will allow them to make improve management decisions based on good data."

This program was made possible thanks to ISDA, İndiana Soybean Alliance, Indiana Corn Marketing Council, Indiana Agriculture Nutrient Alliance (IANA), Indiana Conservation Partnership (ICP) members, U.S. Environmental Protection Agency, farmers and Certified Crop Advisors.

Bidding quiz

You are the dealer and open One Diamond. Your partner responds Two Spades. What would you bid now with each of the following five

nands? 1. ♠ Q93 ♥ 85 ♦ AKJ632 ♣ A7 2. ♠ 63 ♥ K72 ♦ AJ85 ♣ AJ94 3. ♠ 82 ♥ AJ63 ♦ AKQ74 ♣ 95 4. ♠ KQ5 ♥ K7 ♦ KQ9653 ♣ K2

♠ 7 ♥ Q10 ♦ AJ872 **♣** KQ854

 Three spades. Partner's jump shift implies slam aspirations, and you should encourage him by raising his suit at once. It is true that a three-diamond bid at this point would portray your diamond hold-ing nicely, but that is not nearly as important as showing your spade support at the earliest opportunity.

Partner is virtually certain to

have at least five spades, and a direct raise is bound to please him. If you were to bid diamonds instead, it would become well-nigh impossible to convince partner later on that you held three cards to an honor in his suit. The best way to avoid this problem is to raise spades immediately.

2. Two notrump. Here, with a minimum opening bid lacking support for partner's suit, you should try to slow him down as quickly as ossible. The best way to show a balanced hand containing mini-

seller's

as values

12 TV type

mum values is by bidding two notrump. To bid three clubs instead would suggest far greater distribu-tional values than you have.

3. Three hearts. This is the best way to describe your distribution, which is what you should try to do in order to paint an accurate pic ture of your hand. In this way, partner learns that you have more diamonds than hearts, which should be a valuable step in the right direction. How high you go will depend largely on partner's next bid, but the odds favor you

ending up in a slam somewhere.

4. Four notrump. Considering what you can see in your hand, partner is sure to have at least three aces for his jump-shift response. A small slam is therefore certain, and the only question is whether you might have a grand slam. This pos sibility can best be explored by using Blackwood. If partner responds five clubs, showing all four aces, your next bid should be seven spades.

5. Three clubs. It is best to bid naturally over a jump-shift, even with a minimum opening hand. You have length in diamonds and clubs, so you should apprise part-ner of this fact. Three clubs does not imply additional values, though you might, of course, have them.

New

Continued from page 8 The problem was further recognized Oct. 29, 2021, in a playoff game against Monroe Central that has since been named the "Mud Bowl" because players were covered with mud from head to toe because rainy weather and poor drainage.

After that game, the school knew they needed to field, either tearing it up and replanting it or installing artificial turf. With Moser, Clouser-Pen- Clouser-Penrod said. "But and that the kids can't stop rod and athletic director there's so much more that Jason Arnold pushing for we've improved, that peo-

artificial turf, the school board approved. The project moved along

quickly, with construction starting in June and the field being finished last week. Before South Adams could work specifically on the artificial turf, it had to fix all of the drainage issues and then work on other parts of the project like sidewalks that go do something about the around the campus alongside the field.

ple won't even remember what it was like before and we're just really thankful for that improvement as well." The team got to practice

on the field for the first time Sept. 21 and Moser brought out some of the youth athletes to join the varsity squad on the field for the first practice. "The first taste was awe-

some," Moser said. "Espe-"To the naked eye, everymessaging me and texting Moser is expecting a great body sees the turf," me about how cool it was atmosphere for the game. talking about it."

The Starfires have two

home games remaining on their schedule — tonight against Jay County and Oct. 13 against Southern Wells.

With the home opener, homecoming and a projectclose game calpreps.com projects Jay County (4-2, 2-2 Allen County Athletic Conference) to win by one point while John Harrell has the Starfires (3-3, 0-3 ACAC) as cially the youth parents a one-point favorite —

tight knit community that ficial turf.)

on Friday nights," Moser said. "It's going to be an electric atmosphere with a packed house and a good game. They are on the rise and we are trying to maintain (our success) ... so it's a huge game for us as well."

and the town closed down

With the installation at South Adams this year and Jay County following suit with its own project to begin after the school year. five out of the seven ACAC schools will have artificial that you see on a lot of football fields. 'It's like what you see in (Bluffton, Heritage and the movies with the small, Woodlan already have arti-

While the use of artificial turf is growing, South Adams is still proud of the uniqueness it brings them at the Class 1A level and from the checkered pattern on the sidelines (which represent the cross country and track athletes).

"We are one of the few 1A schools that have turf," Moser said. "That's pretty unique to us. ...

"That's not something turf fields, in high school especially, the checkerboard, so that's pretty neat and unique."

New look

Special to The Commercial Review/Mark Wynn

Pictured is an aerial view of South Adams High School's new football field. The field has turf and will be used by the football and soccer teams as well as physical education classes.

South Adams football will play first home game on new turf today against Jay County

By ANDREW BALKO

The Commercial Review Today BERNE marks week seven of the high school football sea-

It also marks the first home game for the

Starfires this year. The Jay County High School football team's visit to South Adams tonight will mark the Starfires' homecoming

their new home artificial turf in 2023 following the completion of a renovation of their field.

weeks of the season, South Adams was scheduled to play two home games — Aug. 25 against Bellmont and Sept. 8 against Heritage. For those two games, the Starfires had to make the

Adams Central High School in Monroe.

"That was definitely frustrating, Through the first six coach Grant Moser said. Adams Schools superintendent) Michelle Clouser-Penrod was if don't care if we miss some home games."

South Adams didn't

and their first game on 12-minute trip north to initially expect to replace its football field. Two years ago, the school was working with engineers to solve drainage problems near the field, the "But what I told (South outfield of the baseball diamond to the north and surrounding areas.

That process helped we're gonna get turf, I them uncover a lack of drainage under the football field.

See New page 7

FRHS grads square off

In 2020, they were playing together at Fort Site Fieldhouse. On Sept. 22, they faced off against each other.

Paige Fortkamp and Allysen Fullenkamp both graduates of Fort Recovery High School squared off as the Indiana Wesleyan University volleyball team beat the University of St. Francis 25-20, 25-13, 25-23.

Fortkamp had eight kills and a block. She recorded a .227 hitting percentage. She also had nine digs and 12 assists.

Fullenkamp played in two of the three sets, recording one dig.

Fortkamp also played in a pair of losses to Marion and Spring Arbor. She recorded seven kills and four blocks against Marion.

She tied with three other players for a matchhigh 12 kills against Spring Arbor.

With only five errors on 36 attempts, she earned a .194 hitting percentage. She also had 11 assists and nine digs.

Jayln Bruns **FŘHS** — 2022

Finished third as an individual in the River Preview at Glade Springs finish line. Resort on Monday.

Bruns did not compete as a part of the IU-East Red Wolves, but rather as an individual during the

Collegiate Check-up

first round Monday while Lainey Jackson competed in the second round Tuesday.

She shot an 87, which was 15 strokes over par, to finish third in the competition.

Jackson placed first while shooting an 83.

Payton Schechter of Midway University shot the best score of players who competed in both rounds, shooting a 158 (14 over par).

Lindy Wood Jay County — 2022

Crossed the finish line in 27 minutes, 30.9 seconds, at the Roy Griak Invitational on Sept. 22 at Les Bolstad Golf Course at the University of Minnesota.

The time earned her a 279th-place finish, scoring 194th for the St. Francis University women's cross country team.

She didn't score, but was the sixth runner for States Conference Fall the Cougars to cross the

Gianna Bomarito of Sonoma State University won the event, running a time of 21:44.2.
